

BUKAKA Boosts Business Agility with a Complete SaaS Cloud Suite from Oracle

Leading Indonesian infrastructure construction company selects Oracle Cloud to support strategic growth and improve decision-making

JAKARTA, Indonesia, 8 February 2017 - PT Bukaka Teknik Utama Tbk (“BUKAKA”) (IDX: BUKK), Indonesia’s leading infrastructure and metal construction company, has selected the complete Oracle Applications Cloud Suite, including [Oracle ERP Cloud](#), [Oracle HCM Cloud](#) and [Oracle CX Cloud](#) to optimize the performance of its finance, sales, and HR organizations. The move to Oracle Cloud is part of BUKAKA’s larger strategy to transform business practices with modern cloud applications.

The digitization of the construction industry is pushing organizations towards an unified, secure platform to leverage data insights that will shape the evolution of their business models and help retain competitive advantage. Oracle Cloud Applications enable organizations of all sizes, and across all industries to increase business agility, reduce complexity and costs, and succeed in an increasingly digital world.

Oracle ERP Cloud can enable BUKAKA to replace its legacy ERP environment with a comprehensive, integrated and scalable cloud-based financial management system. Having real-time visibility into finance operations across the company can empower BUKAKA to drive efficiencies across financial business processes. With accurate financial information easily on hand, the company will be able to focus on business expansion. Built-in social, mobile, and analytic capabilities will allow employees to be connected and effective even while on the go.

BUKAKA was also in need of a global tool that could accommodate the needs of its employees and identify top talent to reinvigorate the company. The existing system is spreadsheet-reliant, and dependent on unscalable, complex manual processes. With Oracle HCM Cloud, BUKAKA can now focus on strategic and developmental elements of HR that contribute to achieving company goals. The single, unified platform can enable the HR team to spend less time on manual processes and more time on driving business productivity by increasing employee engagement and sourcing, and retaining top talent.

As a leading Indonesian infrastructure construction company, BUKAKA has a wide range of customers, spread across multiple countries. The goal is to unify sales and service information, and capabilities in a single application to provide customers with a

truly personalized experience at all touch points. The Oracle CX Cloud Suite helps the company ensure the customer experience they provide propels organizational innovation, and improves business results.

“We wanted to modernize our systems by moving to the Cloud, but we also wanted a single, unified solution that comprehensively addressed a wide range of our global business areas, with room to grow,” said Irsal Kamarudin, President Director BUKAKA. “With the support of Oracle’s Cloud solutions, we now have the modern tools at our fingertips that will enable us to manage our business operations, serve our workforce, and most importantly, delight our customers and partners.”

“We are delighted to be a part of BUKAKA’s journey in modernizing their business. They were looking to integrate modern best practices into their business, in other words, adopt solutions that can help them meet their business requirements and deliver quick return on investment. It underscores BUKAKA’s vision to leverage Cloud technology as a key differentiator to drive business success,” said Erwin Sukiato, Managing Director, Oracle Indonesia.
